SCHEDULE A BRIEF CALL TO SEE IF  
ASIM BASIC FITS YOUR TRAINING PLAN.

# ASIM BASIC TRAIN THE TRAINER

BUILD YOUR OWN ASIM  
TRAINER CADRE IN ONE DAY

If an outside vendor has to fly in every time you need active shooter training, readiness stalls. **ASIM Basic Train the Trainer** is an 8-hour in-person course that builds your internal ASIM trainers so you can train on your schedule, to a common standard.

Turn your officers, firefighters, paramedics, and trainers into a unified ASIM teaching team.

## WHAT ASIM BASIC TRAIN-THE-TRAINER DOES

**ASIM Basic Train-the-Trainer** builds your in-house ASIM trainers so you're not dependent on outside vendors. In a single 8-hour day, your trainer candidates learn to teach ASIM Basic, run practicals, and use our system to track exactly who is trained and to what standard.

- 8-hour in-person course for up to 20 trainer candidates
- Teaches your trainers to deliver ASIM Basic and run practical exercises
- Includes curriculum, ASIM Checklists, Counterstrike<sup>†</sup>, slides, tests, and LMS access
- Creates one standardized way you teach active shooter incident management
- Agency lead has full visibility into training records for audits, grants, and after-action reviews

### Build Internal Trainers

Develop an internal Active Shooter Incident Management cadre that can deliver ASIM Basic on your schedule instead of waiting on outside vendors.

### Standardize Teaching

Use a single, vetted curriculum and checklist so every shift and agency learns the same Active Shooter Incident Management playbook.

### Prove Who is Trained

Centralized records and tests show exactly who has been trained, to what standard, for leadership, unions, and grant reviewers.

NCSA Technology Procurement Bid 27-06-0212. <sup>†</sup>Counterstrike Professional Training System sold separately.

*When an active shooter incident happens, it's too late to wonder who's actually trained.*
